Ahmad Ibrahim Ahmad

AI Software & Systems Engineer

ahmad2005717@gmail.com | +201 065 062 493 | Egypt-Giza | LinkedIn | GitHub

Education

Student @ Faculty of Computing & Artificial Intelligence Cairo University (FCAI-CU) 9/2023 - Now

- **GPA** 3.48/4 5-2026
- **Courses**: a lot of math courses (calculus, complex analysis, number theory, numerical analysis), Algorithms, image processing 1-2 , OOP, theoretical foundation on machine learning, supervised learning, data analytics, data science, data visualization, deep learning, autonomous multi-agent systems, logic & knowledge, ...

Projects

- **Binary Calculator (*First Project*)** *12/2023 - 1/2024* : performs addition, subtraction, and multiplication of binary numbers with high # of digits (string-based).
- **Quantitative Data Calculator** *4/2024 - 3/2024*: calculates and visualizes statistical calculations data (cumulative frequency tables, histograms, polygons, box plots) using Python ‘s Turtle library.
- **Visual-Vortex Photoshop Application (GUI)** *7/2024 - 8/2024*: designed multiple image filters, enhancing skills in image processing and graphics.
- **Tic-Tac-Toe Variants** *11/2024 - 11/2024*: developed an O(1) dictionary search algorithm, optimizing storage to just 2.2 KB only.
- **Matrix Calculator (Team Leader)** *12/2025 - 1/2025*: led a 12 - members team to develop a matrix calculator with cipher algorithms and Gram-Schmidt algorithm visualization with *manim* for Math-3 Course.
- **Food Order System** *5/2025 - 5/2025*: contributed to an ASP.NET project with API integration & MS-SQL Server.
- **Click & Cook Website** *3/2025 - 5/2025* : collaborated on a web application using HTML, CSS, JavaScript, and SQLite, and Django.
- **LeafLens** *11/2025 - 1/2026*: contributed plants disease detector for 34 diseases for 14 plants by DNN, CNN, and GMM.
- **ω^2 Dialer** *6/2026 - 9/2026*: developed dialer phone app to **Wijha-West** Company to automate calling cycles automatically to save time as a trainee with supervisor *Saleh Chadi*
- **Intelligent Sales ChatBot** *8/2026 - 8/2026*: AI shopping assistant featuring hybrid retrieval, sentiment analysis, installment calculations, and dual-LLM fallback via Streamlit.
- **Machine Learning Models for Datasets** *10/2025 - Now*: Tomato-Leaf-Disease, MNIST, Titanic,Yahoo-Finance-All-Stocks-Dataset-Daily, Credit-Card-Fraud, Breast Cancer Wisconsin, Tumor, Cipher-10, and more ...
- **More and More Projects**

In every assignment & project, I seek new collaborators to exchange ideas and learn from. While teamwork has its challenges, I thrive in dynamic environments and enjoy building connections, each project I like to design it perfect with SOLID principals, design patterns.

Skills

- **Programming Languages**: Python, C, C++, C#, Java, Rust, Prolog, SQL, Kotlin
- **Web Dev**: HTML, CSS, JavaScript, Django, ASP.NET Core MVC & API, Axum, Askama, FastAPI
- **Tools**: Git, GitHub, Docker, LaTeX, VS-Code, amChart, Celery, RabbitMQ, Typst (used @ this CV), Redis, Android Studio, TensorFlow, PyTorch, Prometheus, Grafana, Flower, Ollama.
- **Databases**: MSSQL-Server, SQLite, QDrant, Postgres, PgVector, MongoDB, SQLAlchemy & Alembic
- **OS**: Windows and Kali
- **Soft Skills**: Problem-Solving, Teamwork, Communications, and more.

Languages

Arabic (native) **English** (proficient) **French** (basics)
